

Lab program 9b:-

Write a program to check whether given graph is connected or not using DFS method.

```
#include <stdio.h>
```

```
int graph[20][20], visited[20];
```

```
int n;
```

```
/* DFS Function */
```

```
void dfs(int v)
```

```
{
```

```
    int i;
```

```
    visited[v] = 1;
```

```
    for (i = 0; i < n; i++)
```

```
    {
```

```
        if (graph[v][i] == 1 && visited[i] == 0)
```

```
        {
```

```
            dfs(i);
```

```
        }
```

```
    }
```

```
}
```

```
/* Main Function */
```

```
int main()
```

```
{
```

```
    int i, j, start;
```

```
    int connected = 1;
```

```
    printf("Enter number of vertices: ");
```

```
    scanf("%d", &n);
```

```
printf("Enter adjacency matrix:\n");
```

```
for (i = 0; i < n; i++)
```

```
{
```

```
    for (j = 0; j < n; j++)
```

```
    {
```

```
        scanf("%d", &graph[i][j]);
```

```
    }
```

```
    visited[i] = 0;
```

```
}
```

```
printf("Enter starting vertex: ");
```

```
scanf("%d", &start);
```

```
dfs(start);
```

```
/* Check if all vertices are visited */
```

```
for (i = 0; i < n; i++)
```

```
{
```

```
    if (visited[i] == 0)
```

```
    {
```

```
        connected = 0;
```

```
        break;
```

```
    }
```

```
}
```

```
if (connected)
```

```
    printf("The given graph is CONNECTED.");
```

```
else
```

```
    printf("The given graph is NOT CONNECTED.");
```

```
return 0;  
}
```

```
Enter number of vertices: 3  
Enter adjacency matrix:  
1  
2  
3  
4  
5  
6  
7  
8  
9  
Enter starting vertex: 3  
The given graph is NOT CONNECTED.  
Process returned 0 (0x0)   execution time : 10.986 s  
Press any key to continue.
```
